TreatmentTrack

Built by UK dentists

Turn “I’ll think about it” into booked treatment.

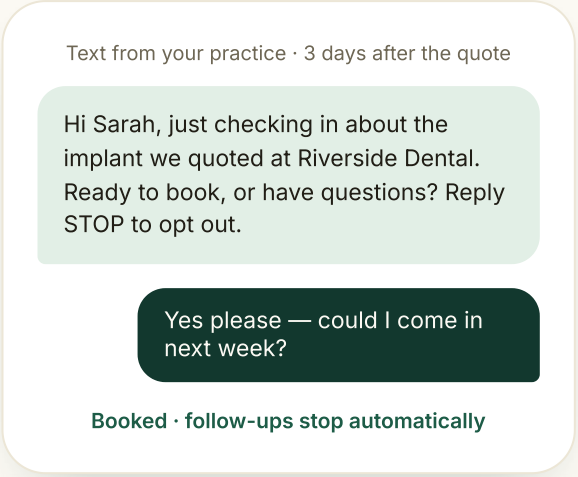

TreatmentTrack follows up every treatment plan your practice quotes, with polite texts and emails in your practice’s name. It stops the moment the patient books or says no — and once they book, it tracks the case through to completion.

How much treatment did your practice quote last month that still hasn’t booked?

How it works

1. **Add your quotes**
   Type one in, or import your unbooked treatment plans from Dentally, SOE, R4 or CareStack.
2. **It follows up for you**
   Polite messages on a schedule you choose — e.g. 3 days, a week, a month — in your words. Patient says “after Christmas”? Pause it until then.
3. **Stops when they decide**
   Mark it booked, declined or lost and messages stop straight away. Replies of STOP are honoured automatically.
4. **Track it to the final fit**
   Booked patients move along a board for each treatment — consultation, consent, placement, scan, fit — and anyone overdue is flagged.

What your patient sees

- Opt-out offered and recorded for every quote (PECR soft opt-in)
- Patient records stored in the UK, with a data processing agreement for your practice
- Dentists only see their own patients; owners see the whole practice
- Reports show exactly how much was booked from follow-ups

Solo	Practice	Multisite
One dentist’s quotes	A whole practice team	Up to 5 practices
£99/mo	£199/mo	£399/mo

Become a founding practice

We’re opening TreatmentTrack to a small number of UK practices first, with founding-practice pricing and set-up done with you. One recovered implant or aligner case typically covers it for well over a year.
